

Display your oneM2M product/business at IoT Week Korea

IoT Week Korea

Hosted by the Korean Government, IoT Week Korea is the biggest event held annually to promote IoT industry in Korea since 2014. TTA has also participated since 2016 enabling Individual Members to promote their oneM2M services and products. Last year, F2F exhibition was cancelled due to COVID-19 and only virtual technical seminars were held. However, Korean government is planning to host AIoT(AI+IoT combined) Week Korea F2F this year. (20th to 22th October)

Particularly, TTA is planning to exhibit several(2 or 3) successful implementation cases of oneM2M from abroad to show off some global oneM2M success stories.

I would appreciate it if you kindly send your company's successful oneM2M business (services or products) to us to be showcased at the AIoT Week Korea to promote oneM2M and your business to Korean.

For your information, I have provided some statistics from previous(2019) event;

Stats of IoT Week Korea 2019 (the last f2f exhibition)

- 17,324 participants from 32 countries
- 360 booths from 154 companies
- 9 countries government/organization officers outside of Korea
- 197 cases of on/offline news report.
- 10 concurrent events (e.g., IoT Awards, conferences)
- Homepage(ENG): <http://www.iotweek.kr/2019/eng/main.asp>

Information requested from participating companies/organization

- Brief introduction of your product / business, including how / what factors of oneM2M assists yours.

(Simple English text is okay. TTA will translate(ENG-KOR) and design contents.)

- Photos / Statistics / Video clip
- Any information helps me and audience.
