Re: Nomination of Richard Brennan - ARC Vice Chair

Telxxis LLC, a Telecommunications Industry Association (TIA) member, is pleased to nominate Mr. Richard Brennan for the position of Vice-Chair, **oneM2M** Architecture Working Group (WG2 - ARC).

Richard has chaired architecture working groups continuously over the last 10 years, including ETSI TISPAN WG2, where he was also TISPAN TP Vice-Chair, and at the Open IPTV Forum (OIPF).

In the formation of **oneM2M**, Richard has been directly involved since the earliest discussions between Partner SDOs, and was a member of the CCSA delegation to the Founder's group throughout the formation process.

In support of initial activities, Richard led the naming ad-hoc group which resulted in agreement on the **oneM2M** name; has acted as a Convenor/Co-Convenor of **oneM2M** sub-committees, and is currently the Rapporteur for the Architecture Part 1 deliverable.

During technical meetings, Richard is known for his neutral and balanced yet procedurally effective approach, and for the ability to facilitate meaningful consensus. His Silicon Valley roots ensure an informal meeting style, but with the assurance that all agenda items will be addressed, and that inputs will be heard and discussed equitably.

Richard's commitment to the industry spans decades, and continues to be unwavering. He remains dedicated to the evolution of multiple complementary technologies, and to advancing the standardization and interoperability of new initiatives.

Telxxis LLC was founded in 2001 to provide independent consulting services in Telecom Technologies and Business Management. With Partner resources in Europe and the US, Telxxis also works to develop Social Media-based applications which let users enhance organizational effectiveness.

Sincerely,

ss/
