To: oneM2M Officers and oneM2M Secretariat

**Letter of support for the nomination of Dragan Vujcic as oneM2M SEC WG4 Chairman**

Dear oneM2M Officers and oneM2M Secretariat,

I am pleased to inform you that Oberthur Technologies, through its ETSI affiliation, is nominating Dragan Vujcic as a candidate for the oneM2M WG4 Chairman role in the upcoming SEC WG4 chairmanship election. Oberthur Technologies will fully support Dragan in his chairmanship role if elected.

Dragan has been active in standardisation area since 1998, working for several multinationals on network, device and now on security in research system design and standards. Dragan's strength in standards is derived from his longstanding active participation in 3GPP. He has been an active member for several years and developed a deep understanding of the technical challenges and working methods to make standards successful for time to market. His technical background and the leadership skills he developed will help him to contribute to the progress of oneM2M Security WG4 in a constructive and impartial way. His consensus building spirit will help to ensure a consistent approach and productive relationships with the others groups in the oneM2M, to aid consensus building and constructive progress. Dragan is currently leader of Oberthur Technologies M2M standardization.

In proposing Dragan for the position of Chairman of oneM2M Security WG4, Oberthur Technologies is committed to the success of oneM2M. With his deep experience from standards we are confident that Dragan will bring a very positive influence and leadership to oneM2M Security WG4 while respecting the views of all participants to further strengthen the foundation for success in M2M services delivered through the deployment of oneM2M system.

Best Regards,

**Christian LEFEBVRE**  
**Telecom Product Line Director**
