

To: oneM2M Technical Plenary

Subject: Letter of support for oneM2M ARC WG Vice Chairman

I am pleased to confirm that KETI supports SeungMyeong Jeong to continue his role as the Architecture Working Group Vice Chairman.

SeungMyeong has been working at ARC WG actively as a leadership member as well as a standard delegate. As the ARC WG leadership, he initiated the TS-0001 (Functional Architecture) RIT (Readability Improvement Task) to better show benefits of oneM2M functional architecture to developers. Furthermore, he created the new WI for oneM2M platform feature catalog. With these endeavor, oneM2M would fortify its market adoption efforts. As the delegate, he has brought a lot of technical contributions and won the first oneM2M Technical Excellence Award in 2015.

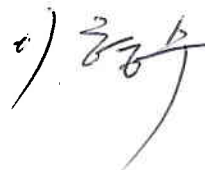

As the KETI delegate, SeungMyeong will provide more inputs from oneM2M related research and pilot projects that KETI is actively participating in Korea and overseas. This would be beneficial for oneM2M to broaden oneM2M ecosystem globally.

KETI will provide necessary supports for SeungMyeong if he can get an honor to keep working as the ARC WG Vice Chairman.

Sincerely Yours,

**Hyung Su Lee**

Vice President

Korea Electronics Technology Institute
