OneM2M Technical Plenary

Subject: Nomination of candidate for the position of OneM2M Working Group 3 (PRO) Vice Chair

IBM is pleased to nominate Peter Niblett as a candidate for the position of vice chair of the Protocols Working Group (WG3) under the OneM2M Technical Plenary.

Peter has contributed to oneM2M release 1 by leading the XML Schema definition work for the Core Protocol specification as well as being Rapporteur for the MQTT Protocol Binding, and helping with other details of the core protocol TS in a collegiate and constructive manner.

He has been involved in a range of standards activities over many years, including chairing an OASIS Technical Committee and participating in the definition of the Java Message Service api. He is also actively involved in the MQTT Technical Committee and is a member of the Continua Services Technical Working Group.

IBM provides a range of IoT services and solutions, and recognises the importance that standards have in building a true IoT / M2M ecosystem.

Yours faithfully

Gerry Reilly  
Director Internet of Things Solutions and Cloud Development
