oneM2M Technical Plenary

Subject: Nomination for Vice Chair of oneM2M System Design and Security Working Group

IBM is pleased to nominate Peter Niblett as a candidate for the position of vice chair of Working Group 2 under the oneM2M Technical Plenary.

Peter has served as chair of the former Protocols Working Group for the last two years. Under his leadership the working group has successfully delivered release 2 and release 2.1 versions of the Core Protocol specification and the HTTP, CoAP, MQTT and WebSocket protocol bindings. Peter has also been the rapporteur for the MQTT protocol binding and is currently acting rapporteur for the Core Protocol. He has shown commitment to producing quality specifications and his knowledge of protocols, standards and IoT will be an asset to the working group and to the wider oneM2M partnership.

Peter has been involved in a range of standards activities over many years, including chairing an OASIS Technical Committee and participating in the definition of the Java Message Service api. He is also actively involved in the MQTT Technical Committee at OASIS.

IBM provides a range of IoT services and solutions, and recognizes the importance that standards have in building a true IoT / M2M ecosystem.

Yours faithfully
