To: oneM2M Officers, oneM2M Secretariat

Subject: Letter of support for oneM2M SDS WG Vice Chairman

I am pleased to confirm that KETI supports SeungMyeong Jeong to continue his role as the System Design and Security (SDS) Working Group (WG) Vice Chairman.

SeungMyeong has been serving the SDS WG Vice Chairman as well as the KETI delegate. He has been working with the Chairman to lead standardization work. Also, as part of the oneM2M leadership and one of the leading members, he has been collaborating with other experts for oneM2M technical promotional activities such as international hackathons, workshops and tutorials with the KETI's supports.

As the KETI delegate, SeungMyeong will cotinue to contribute technical inputs, aligning with KETI's R&D projects, such as AI enablement for IoT systems. New features for oneM2M should be proven by implementation on Mobius open source and its applied systems, so it should be benefitial to expand oneM2M ecosystems globally.

KETI will provide necessary supports for SeungMyeong if he can get an honor to keep working as the SDS WG Vice Chairman.

Sincerely Yours,

Ko, Jae Jin

Vice President
