

TSG-SX Correspondence

Dr. Xiaowu (Frankle) Zhao
Chair, 3GPP2 TSG-SX
ZTE Corporation
tsgsx_chair@3gpp2.org

June 7, 2013

To: oneM2M Technical Plenary

Subject: RE: LS on interaction of oneM2M with Underlying Networks

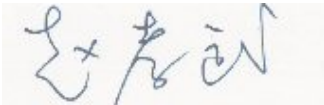

Dear oneM2M,

3GPP2 wishes to thank oneM2M for your inquiry into support for oneM2M functions in 3GPP2 networks.

For consistency in core network interfaces to the M2M server, 3GPP2 has decided to reuse the Tsp interface being defined by 3GPP. 3GPP2 is investigating further enhancements that use the capabilities of the 3GPP2 air interfaces and networks. For example, 3GPP2 is investigating the service request for multicasting to a group of devices as you mentioned in the LS.

3GPP2 would like to be kept abreast of the use cases, requirements, and architecture being developed by oneM2M. 3GPP2 is also willing to cooperate with you to develop the requirements for the interface between the oneM2M service layer and an underlying 3GPP2 network.

Sincerely,

Dr. Xiaowu (Frankle) Zhao
Chair, 3GPP2 TSG-SX
