

GCF Steering Group Meeting #97 12-14 December 2023, Dubai

Liaison Statement

For submission to: oneM2M Technical Plenary
Copy to: IAG, TTA

Source: GCF Steering Group

Document: S-23-203r1

Subject: Support of oneM2M Certification in 2024

Contact Person: Liaisons@globalcertificationforum.org (Lars Nielsen, GCF CEO&GM)

Summary of Content

The Global Certification Forum would like to inform oneM2M that it has been reviewing the services offered to non-members of GCF and would like to share the outcome with oneM2M TP and TTA.

Since 2022 oneM2M certification has been used by two companies certifying Release 1 products. At current time there is no test platform for Release 3 or higher testing which prevents GCF to offer oneM2M Release 3 or higher certifications.

GCF's expectation is that no or very few certifications may take place in 2024 particular in the lack of test means for Release 3.

To omit the cost of running a dedicated website which is not used by the industry, it is expected that SG#98 may decide not to offer oneM2M certification to the industry in 2024.

Actions

oneM2M and TTA are kindly requested to comment on the considerations of GCF. It should be noted that GCF may also consider continuing to offer the oneM2M certification service if a partner organisation would take over the cost related to offer the service.

Dates of Next Meeting

GCF IAG#73: 4 January 2024 online

GCF SG#98: 13-14 March 2024, Toronto, Canada
